

3 hybrid work challenges AI helps solve

How AI-enabled tools help people be connected and productive

Connection is a key component for a healthy relationship with work, and 65% of workers using AI say they feel a greater sense of connection with their work.¹

Help everyone sound like a pro

The image our teams project to customers and clients is critical. Workers need to come through clearly without background sounds breaking through, and they need to present themselves confidently and fluidly.

- Select HP Poly headsets let every conversation shine with an AI machine learning algorithm that intelligently recognizes and reduces background noise to enhance call clarity.²

Help everyone stay focused

Whether team members are working in or out of the office, online meetings are now a given for most. Make it easy to take video calls even in busy or distracting environments.

- Use AI voice commands to answer a call with your voice. Select headsets use machine learning to generate an algorithm that can process speech from a user and recognize specific commands to Answer or Ignore incoming calls.³

Support anytime, anyplace work

In hybrid work, not only do people need tools that can go anywhere, but they also need support wherever they may be. With most devices like a headset, there's no remote manageability.

- The HP Poly Lens app⁴ lets you provide remote troubleshooting, updates, and inventory control for Poly headsets.

From AI-enabled headsets to conferencing systems and manageability tools, HP Poly helps you help your hybrid work teams.

Find the HP Poly solutions that fit your needs.
